

## Extension of TTF Natural Gas Month Derivatives

Dear Trading Participants,

The European Energy Exchange (EEX) extends the admissible number of individually tradeable expiries within the EEX TTF Natural Gas Month Futures and EEX TTF Natural Gas Month Option (Futures Style) to further maturities.

With effect from **28 June 2021**, the number of admissible maturities for both instruments will be extended to the next 12 individual months. This extension will automatically be available for all clients currently admitted to the EEX TTF Natural Gas Month Futures and Options.

Transactions concluded in the EEX TTF Natural Gas Month Futures or EEX TTF Natural Gas Month Options (Futures Style) that exceed the admissible number of 12 individual months will be cancelled by the Exchange. The registration of bundled delivery months within the EEX TTF Natural Gas Month Options (Futures Style) via STP will still be possible.

Please do not hesitate to contact us if you have any further questions.

Yours sincerely,

**European Energy Exchange**
